CHIEF COMPLAINT (Mechanism of Injury/PQRST)

Called to a grass area behind a multi-story parking garage. 911 call was initiated by the VTA in a neighboring area. They claimed that they saw somebody fall from the garage to the ground. This was seen through a security camera. Pt found in a general supine position, and appeared to fall into a chain link perimeter fence, with barb wire over the top. Pt found pulseless, and apneic. No major trauma seen anteriorly. Minor abrasions seen to hands only. Pt fully dressed in a "priest" outfit. No rigor mortis seen. Pt was placed on a defibrillator to read asystole. Pt was pronounced dead at 1648. Scene was left for SJPd, upon arrival. E5 returned to service.
